Environmentally Friendly

Did you know?

We are committed to caring for our environment. Our tray manufacturing processes are incredibly efficient creating less than 1% wastage. Between 10 & 20% of the material used for each tray is recycled content, this level still allows us to ensure the structural integrity giving the tray its strength.

Our trays are manufactured to last but when they do reach the end of their life, they can be 100% recycled and should not be sent to landfill.
