

HELLO, WE ARE TITAN.

We're a worldwide designer, manufacturer and distributor of the strongest and finest range of classroom furniture and are part of the tc group.

We recognise that in an educational environment, comfort is key to help improve concentration and a student's ability to learn. We endeavour to ensure that our furniture is durable, supportive and appropriate for all learning spaces.

That's why we were the first UK manufacturer and distributor to meet British ergonomic standards set out by the technical committee for Europe.

One of the biggest battles in education is making sure it is tailored to an individual's specific needs. One way of tackling this is by making the learning environment as flexible as possible.

This catalogue includes an extensive range of furniture for all key stages spanning from Foundation all the way up to post 16 years. The age range and variation in product type allow you to create a flexible and collaborative learning environment.

OUR VALUES

Do what is right, always do it together, be extraordinary, aim high and keep it real.

Our way of thinking always starts with 'people first'. Being real and bringing our authentic selves to work each day helps build trust and accountability among our teammates, which creates a positive environment to do our best work. We collaborate with our co-workers and clients - valuing each other's ideas and believing that teamwork will produce the best results.

And every one of us cares. About everything really, be it the materials we use, the environments we create or simply about always doing the right thing. Each of us brings a different talent to the table, and together we make the finest education furniture.

ENVIRONMENT & RECYCLING

Here at Titan, we recognise that respecting the environment has never been so important, and therefore we want to make sure we do our part in having the smallest negative impact possible.

So much so, waste from our production of Titan chairs or chairs that do not meet our quality control standards are either recycled and used to make general household objects such as milk crates, supermarket bread baskets and wheelie bins. The metal and plastic components can be refurbished and reused to ensure we continuously feedback into the production of new Titan Chairs and reduce our impact on the environment.

Concern for the environment and the connection humans have with it is an integral and fundamental part of

Titan's corporate business strategy and this reflects in our products. We have launched our first ever sustainable, contemporary, wooden classroom chair that is available in the form of a stacking, canteen and conference chair.

Crafted from layers of premium beech veneer, it is FSC certified, which means the product is environmentally friendly and protects and maintains high conservation value forests.

Biophilic design

In education spaces, being able to connect with nature is proven to increase rates of learning, concentration and attendance.

This connection to nature is called Biophilia, and it focuses on human beings' innate attraction to nature and natural processes. Biophilia was first

introduced by psychologist Edward O Wilson in the '80s after he observed modernisation and urbanisation were causing people to lose their connection with nature. As technology becomes commonplace in contemporary society, the importance of Biophilia today cannot be overemphasised.

TITAN'S CIRCULAR ECONOMY

1. We sustainably source all our materials at Titan. Any leftover plastic waste that cannot be mechanically recycled is sent to Plastic Energy. Plastic Energy chemically recycle plastic waste and uses the energy produced to operate their recycling plants for years to come.
2. By using predominately plastic and steel all Titan branded furniture is fully recyclable.
3. The design of Titan chairs is carefully thought out for both their use and their reuse. The continuous design ensures there are no pinch points or sharp edges, great for children in educational settings, and also ensures no unnecessary materials are used, such as binding glue. The legs on plastic chairs are gas injected which allows the legs to be hollow and minimise the amount of plastic use.
4. During the production of our Titan chairs, we minimise the amount of waste. Still, the small amount that does get wasted during production is made into new black chairs, milk crates or wheelie bins by mechanically recycling plastic.
5. We offer up to 20 year guarantees on our Titan chairs, and also replace components wherever possible.
6. If for some reason up to 20 years is just too long for you, we can collect your old chairs and feed them back into making something new!

STANDARDS

We make all our products with comfort and durability in mind. We know that school furniture needs to support children, improve their posture, and endure the demanding environments of classrooms. Our furniture is constructed to be ultra-strong so that it can withstand high impacts while still being easy to maintain.

Designed for Classrooms

Our furniture is designed to suit various classroom environments. Our seating comes in a range of sizes and colours and is strong and durable yet lightweight for easy moveability to create stimulating classrooms.

Independently Tested

All of our products are independently tested to conform to the latest British Standards for ergonomics, strength and stability.

- Ergonomics for schools BS EN 1729:1
- Strength and stability for schools BS EN 1729:2

Ergonomics

Our seating ranges have ergonomically designed back angles to promote a positive S shaped spine, which reduces the risk of lower back pain. The chairs are produced in a range of sizes to best accommodate children of all ages.

Safety

Designed for the needs of the classroom, our products are anti-tamper and low maintenance. There are no sharp edges on any of our products and most of our chairs have no pinch points and many also have anti-tilt legs.

ISO 9001 - Quality Control

We comply with ISO 9001 quality control standards which ensures our products and services are of the highest possible quality. This provides you with complete peace of mind during the ordering process and product life-cycle.

Recyclable

We are committed to trying to provide environmentally friendly products. All of our metal and plastic can be recycled to help you meet your recycling targets. We are an FSC accredited company & ISO 14001.

Strength

Our furniture range is constructed to be ultra-strong and withstand the toughest classroom environments. Titan products are built using high durable polypropylene and super strong steel.

Longevity

We are very confident in the quality of our products. That is why our entire range comes with extensive guarantees which protect you against the unlikely event of product failure.

CERTIFICATION & GUARANTEES

We only supply premium furniture products that are industry certified and have gone through extensive quality controls. As a result, we confidently offer long guarantees with our range.

All our seating products carry a 5-year guarantee as standard, unless indicated otherwise. Our standard guarantee applies when the product has been maintained and used for the purpose intended, under normal conditions. Replacements necessitated by accidents, improper care or use, negligence or a natural breakdown of colours and materials over an extended period of time and use are not covered.

Our Titan One Piece chairs come with an impressive 20-year guarantee. They are made from ultra-strong polypropylene and are well documented in terms of their longevity, comfort and safety in the school environment. They have no screws making them tamper proof and have no sharp edges to prevent damage or injury.

EN 1729 Size Colour Coding

We conform to EN 1729 standards of colour coding different size seating for children.

That is why several of our seating ranges such as the Skid and 4-Leg have different colour feet depending on the size of the chair.

	Size1	Size2	Size3	Size 4	Size 5	Size 6
Age:	3 - 4	4 - 6	6 - 8	8 - 11	11 - 14	14+
Overall Height:	510mm	555mm	655mm	685mm	770mm	805mm
Seat Height:	265mm	310mm	355mm	385mm	425mm	460mm
Table Height:	460mm	530mm	590mm	640mm	710mm	760mm

OUR SERVICES

Dedicated to making your ordering experience as smooth as possible by tailoring your order especially for you; you can complete your Titan order with the help of our other services below:

Unlimited Colours

You can order your Titan chairs in almost any colour you desire, the possibilities are endless! Simply send us a sample of the colour you wish your chairs to match and we'll take care of the rest.

- A minimum order of 300 chairs will be manufactured at no extra cost.
- Orders for fewer than 300 chairs may be subject to a surcharge.
- Please allow up to 10 weeks for delivery of special colours.

The Titan One Piece sizes T5 and T6 are moulded in the UK allowing us to deliver special colours and larger project quantities in these sizes much quicker. Up to 1800 chairs can be delivered on just one of our super size curtain sided delivery trucks!

Upholstery

All Titan chairs can be fitted with an upholstered seat pad for added user comfort. These are available as standard in any colour in the Camira Pheonic fabric range. Both fabric ranges and foams are fire retardant. **Unlimited fabrics and colours are available on request.**

OUR DELIVERY SERVICES

We have a few delivery services available, all tailored to you and your specific requirements. If you need any more information about any of the services outlined below, please contact our sales team and they will be delighted to assist you.

Delivery & Installation

We offer a quality Delivery and Installation service which takes the stress out of setting up your new furniture.

An installation team will deliver and install to an onsite location of your choice. Upon completion of any installation all unwanted packaging will be removed, and where possible, recycled, leaving the site ready for immediate use. All of our delivery and installation staff are fully insured and health and safety certified.

The process is as follows:

- You will be able to book a delivery slot within or outside opening times.
- We will ascertain any issues that may prevent delivery (i.e. parking restrictions).
- All ordered products will be checked before leaving our warehouse.
- You will receive a call 1 hour prior to delivery to prepare you for our team's arrival.
- Delivery will be carried out by our dedicated Titan drivers using our own vehicles.
- The goods will be unpacked and inspected to ensure nothing is damaged.

Room of Choice

If you need some additional assistance, but not full installation, our Room of Choice option is the service for you.

We offer a two person delivery, to the room the products are being used. We take out all the heavy lifting and transporting of goods, leaving everything exactly how you want it.

Containerised

All Titan furniture products can be supplied in 40 foot cubed and 20 foot cubed container quantities for shipping to any address worldwide. Choosing direct container delivery will reduce the carbon footprint and cost of your order.

Please note:

Some items may come in component form for container deliveries.

Nominated Day

We endeavor to make life just that little bit easier for all our customers. Our Nominated Day delivery service is tailored to fit around you. You choose the day and time slot; we'll do the rest.

Assembled Chair

We understand that sometimes assembling chairs can be time-consuming. Here at Titan. Your chair will always arrive built.

WHAT MAKES ARC SPECIAL?

Arc was conceived and designed in the UK. It is a new aesthetic for Titan and will define the brand for years to come. It is a robust, single shell, injection moulded chair – multipurpose and versatile with various leg sets and colour palettes from which to choose.

It is 100% recyclable, fire retardant and contains an antimicrobial additive which is clinically proven to kill >99.9% of MRSA and E Coli bacteria whilst also inhibiting fungal growth.

It is one of a limited number of products that has been certified to both Parts 1 & 2 of the education standard BS EN 1729, specifying strength, stability, and ergonomic requirements.

Arc Skid

Meticulously designed and crafted with libraries, lecture halls, and contemporary learning spaces in mind, the Arc Skid chair proves to be versatile. Its unique 'skid' feature, tailored for floor friendliness, is seamlessly integrated into the chair's design, enhancing both functionality and aesthetics.

Crush Bent Classroom Table

These tables are designed with crushed, bent steel frames and are available in various shapes and sizes. Moreover, each table features a high-quality pressure laminate finish on an 18mm MDF top, which makes it durable and long-lasting. The MDF edge is bull-nosed, polished, and lacquered with a wood-effect finish. These crushed, bent tables can be easily stacked up to eight high, which makes them easy to store.

Classroom Layout Design

The layout of a classroom can significantly impact productivity and engagement levels. You can tailor the environment to suit various activities and student groups by experimenting with different configurations.

Rows of Individual Desks

The traditional layout of rows with individual desks serves its purpose in specific teaching scenarios. It is beneficial when the teacher needs to demonstrate content visible to all students or when individual work is required, such as during examinations. However, this layout can limit social interaction, although pairing students may work to mitigate this effect.

Benefits:

- Ensures equal visibility for all students
- Suitable for demonstrations and individual work
- It can be adapted for social learning by pairing students

Arrange into Groups

Group seating offers numerous advantages, particularly for speaking and listening activities. Students seated in groups are better positioned to collaborate and learn from one another, fostering a cooperative learning environment. Groups of six are especially effective, as they can easily be divided into pairs or trios without rearranging seating.

Benefits:

- Promotes collaborative learning
- Enhances speaking and listening skills
- Suitable for hands-on activities and younger learners

U-Shape or Horseshoe

The U-shape or horseshoe configuration is a classic design favoured by many educators for its ability to foster active participation. The semi-circle layout encourages discussions and enhances student collaboration, making it ideal for classes focused on dialogue and interaction.

Benefits:

- Encourages participation and discussion
- Facilitates collaboration between students
- Ideal for classes emphasising group interaction and engagement

Classroom Table Finishes

Colour can influence mood and impact performance and productivity. Bright and light and natural tones can create a more positive and calming effect. Predictable patterns help us to understand, manage and navigate spaces. Geometric shapes help to create balance and calm in the classroom.

TEACHER WALLS

05

Welcome to the Teacher Walls section of our Titan Catalogue. Our Teacher Walls are meticulously crafted to empower educators with versatile and organised spaces, enhancing their teaching environments and fostering an atmosphere of creativity and efficiency. These thoughtfully designed solutions are tailored to meet the unique needs of teachers, providing them with an array of features that seamlessly integrate technology, storage, and display capabilities.

Teacher Walls

Introducing our innovative storage walls, designed to revolutionise classroom organisation and functionality. Our storage walls are not just a solution but a statement of versatility, style, and practicality. Available in many finishes, these walls seamlessly blend into any classroom decor, whether you prefer a modern, sleek aesthetic or a more traditional look.

But it's not just about style; it's about substance, too. Our storage walls offer a range of hardware and locks, ensuring the security of your belongings and peace of mind for educators and students alike. Whether you need keyed locks for sensitive materials or combination locks for quick access, we've got you covered.

The beauty of our storage walls lies in their customisability. Each classroom is unique, and neither should their storage solutions be. Our walls can be tailored to fit any available space, whether a small nook or a sprawling classroom. Need specific dimensions or compartments? No problem. Our design team will work with you to create a storage solution that meets your needs.

And it doesn't stop there. Our storage walls can be scribed in and seamlessly integrated into your classroom environment for a cohesive look. Alternatively, they can stand out as a focal point, showcasing your school's commitment to organisation and functionality.

Transform any space into a dynamic learning environment with our three suggested and customisable modules: Teach, Collaborate, and Cupboards?

1. Teach

Empower your teaching with the Teacher Wall module, incorporate state-of-the-art interactive whiteboards and instructional tools and elevate your lessons by seamlessly integrating multimedia resources, diagrams, and real-time annotations. Whether presenting complex concepts or facilitating group discussions, the Teacher Wall enables dynamic engagement and enhances students' comprehension. Foster an environment where learning thrives, as students actively participate and collaborate in their educational journey.

2. Collaborate

Inspire collaboration and teamwork with our Collaboration Wall module, designed to showcase student ideas, foster creativity, and facilitate peer-to-peer learning. Create a vibrant space where students can share insights, brainstorm solutions, and explore diverse perspectives. From group projects to interactive brainstorming sessions, the Collaboration Wall encourages active participation and promotes a culture of collective achievement. Fuel innovation and ignite passion as students collaborate, communicate and co-create within a supportive learning community.

3. Cupboard

Optimise your classroom layout with the Cupboard Wall module, offering discreet storage solutions to streamline organisation and maximise space utilisation. Say goodbye to cluttered classrooms and hello to a tidy, efficient environment where every item has its place. From storing bulky equipment to housing teaching aids and supplies, the Cupboard Wall ensures easy access to essential materials while maintaining a clean and organised aesthetic. Enhance the functionality of your space and create an inviting atmosphere conducive to focused learning and productivity.

Media Tray Wall

Our Media Tray Wall functions as a versatile hub for educational materials, technological equipment, and various school stationery offering a tailored space perfectly suited for a range of educational settings, such as classrooms, offices, and laboratories.
